Skills Adaptation/Anticipation and Labour Market Needs

#Stride4StrideBxl

Stride
for
Stride

***EARLALL's
Skills & Labour Market Working
Group***

Specific Sectors and Market Needs:

- ***Industry 4.0***. Automation in Manufacturing Technologies (cyber-physical systems, the Internet of things, cloud computing and cognitive computing)
- ***Soft skills*** for the workplace (communication skills, creative and critical thinking, problem-solving, resourcefulness, confidence, flexibility)

WP Main Challenges/ Objectives

- More employability of students and apprentices.
- More implication of the companies in each region.
- Innovation and improvement of students' competencies and training paths.
- Creation of a more global market place.
- Gender equality in the labour market.
- More mobile workers.

WP Concerns

- The rapidly changing markets.
- The needs not to be the same for all regions.
- Not the same degree of implication on the project by all the participating regions.
- Change of staff in each institution.

WP Next Steps

- To recollect each region's needs: *programme objectives* and indicators.
- To create a programme of *working visits*.
- To apply for *European funding* to achieve the WG objectives.
- To design a *working calendar* to achieve the objectives and indicators agreed.

*Thank you for
your attention*

Skills anticipation & adaptation to labour market needs

EARLALL conference, Brussels

Brussels, 11 October 2018

Michael Horgan, Skills & Qualifications,
DG EMPL

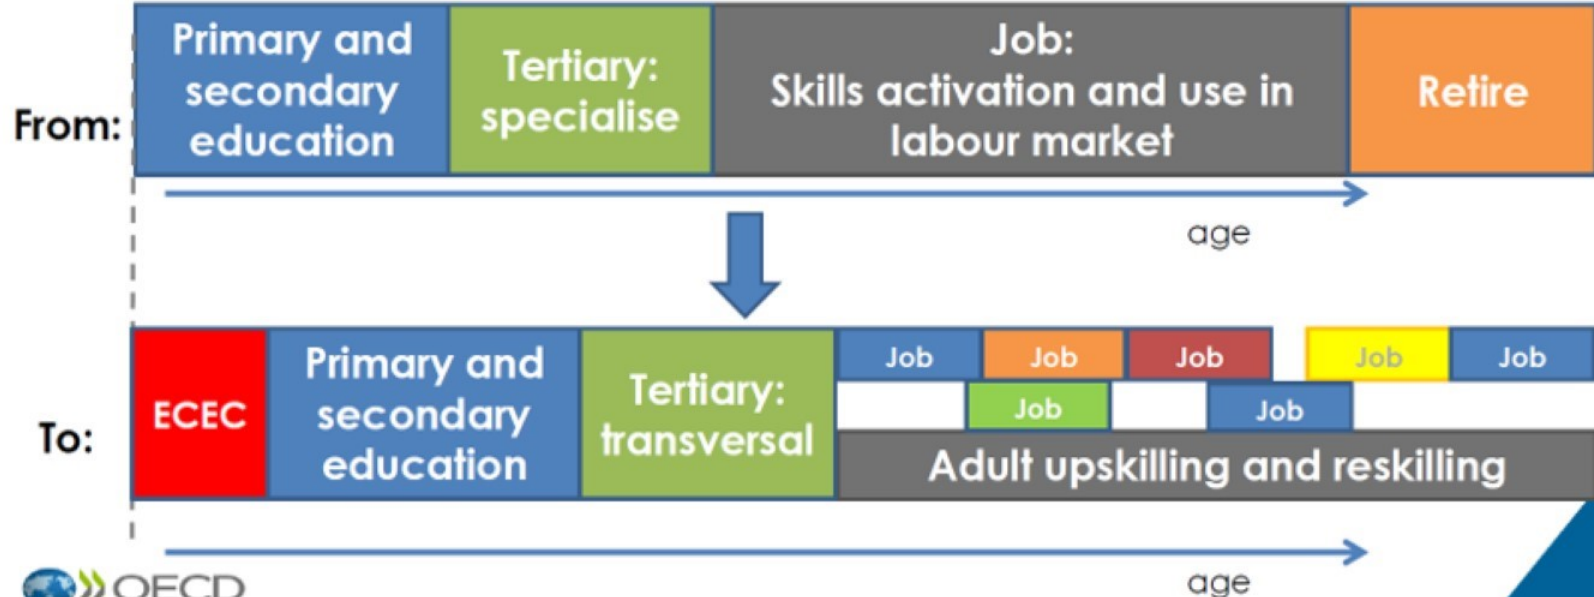

The main challenges we face

1. *Digital transformation, globalisation, robotisation, automation*
2. *Ageing and shrinking workforce*
3. ***Economy of transitions/Life Long Learning imperative***
4. *Skills mismatch*
5. *Polarisation*

A new model for skills development

We need a new model for skills development

EU Policy framework

- Importance of skills/human capital for the European semester
- Skills Agenda for Europe
- EU benchmarks for 2020 and the ET2020 framework
http://ec.europa.eu/education/policy/strategic-framework_en
- Parallel approach - Job-specific skills (Short Term) v Key competences (Medium to Long Term)

NEW SKILLS AGENDA FOR EUROPE

Quality & relevance of skills

1. Upskilling Pathways

2. Key Competences Framework

3. VET as a first choice

4. Digital Skills and Jobs coalition

Visibility and comparability

5. Revision of EQF

6. Skills profile tool for 3rd country nationals

Skills intelligence

7. Revision of EUROPASS

8. Analysis of brain drain

9. Blueprint for Sectoral Cooperation on Skills

10. Initiative on graduate tracking

Making VET a first or equal choice

DISCOVER

The Digital Competence Framework

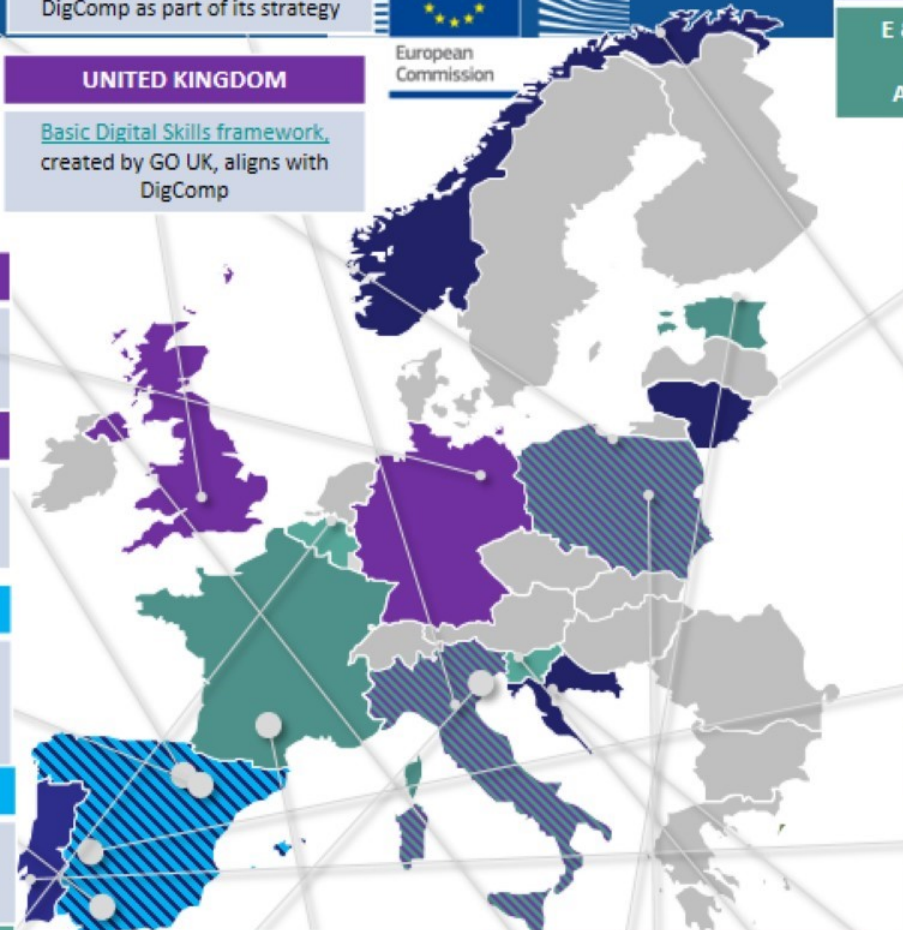

DigComp's five key areas and 21 competences

Member State implementations

Jan 2017

European
Commission

POLAND
The Min. of Digital Affairs published a [catalogue of digital competence frameworks](#) for Digital Poland 2014-2020 referring to DigComp

ITALY
[Italian Digital Agenda](#) will translate and implement DigComp as part of its strategy

TEACHER PROFESSIONAL DEVELOPMENT
E & T CONTENT /STUDENT ASSESSMENT

ASSESSMENT FOR EMPLOYABILITY
POLICY SUPPORT, FRAMEWORK IMPLEMENTATION

MALTA
Use of DigComp by the Ministry for Education and Employment in Maltese "[Digital Strategy](#)"

UNITED KINGDOM
[Basic Digital Skills framework](#), created by GO UK, aligns with DigComp

GERMANY
A new strategy 'Education in the digital world' ([Bildung in der digitalen Welt](#)) builds on DigComp (+2 other frameworks)

NAVARRA, SPAIN
Navarra Department of Education uses DigComp as a key reference for strategic planning

LITHUANIA
Translation of the DigComp framework by the [Education Development Centre](#). Used for Teacher PD

NORWAY
The Centre for ICT in Education uses DigComp as a references to develop a DigComp framework for the teaching profession

BASQUE COUNTRY, SPAIN
[Ikanos project](#) developed by the Basque Government to deploy the Digital Agenda. Free [DigComp self-assessment](#) and training

SPAIN
The Min. of Education, INTEF created [Common Framework for Teacher Digital Competence](#) based on DigComp. Use agreed between State and Regional governments

ANDALUCIA, SPAIN
"[Andalucia digital](#)" offers free DigComp self-assessment and training for job-seekers

EXTREMADURA, SPAIN
Extremadura implements [Teachers Digital Competence Portfolio](#) based on DigComp

FLANDERS, BELGIUM
Dept. of Education use DigComp for a curricula review and development of adult education courses

FRANCE
PIX platform being developed by the Min. of Education to certify digital skills based on DigComp

ESTONIA
From 2017 on, all 9th graders will be evaluated using DigComp

PORTUGAL
The Min. of Education uses DigComp as an input for teachers' PD. [Translation](#) by [CIDTFF](#), supported by the MoE

REBIUN, SPAIN
The Network of Spanish University Libraries (REBIUN) uses [DigComp to upskill](#) students in 76 Spanish universities

EMILIA-ROMAGNA REGION, IT
Uses DigComp to re-design courses/materials in [Pane e internet](#), an e-inclusion initiative

POLAND
Training for certification purposes based on DigComp provided by [ECCCFoundation](#) and [ECDL in Poland](#).

CROATIA
e-Schools project by Croatian Academic and Research Network uses DigComp to support teachers

SLOVENIA
Translated by National Education Institute. DigComp used in assessing students in ICT

The Entrepreneurship Competence Framework

European Qualifications Framework

translation grid for qualifications across the EU and beyond

**The EQF Council Recommendation revised in May 2017
Monitored by the EQF Advisory Group**

8-level meta framework

covering all types and levels of qualifications

defined in terms of learning outcomes

27 MS have already referenced their national frameworks to the EQF

19 MS are putting the EQF levels on certificates and diplomas

A total of 39 countries currently participate and have committed to the EQF

VALIDATION

Validation means a process of confirmation by an authorised body that an individual has acquired learning outcomes measured against a relevant standard

Identification

Documentation

Assessment

Certification

Labour market & skills intelligence activities in the EU – why?

- *(LMSI) provides information on current and future labour market trends and skills needs*
- *Is the basis for informed decisions by policy makers, enterprises and individuals including at regional/local level*

Labour market & Skills intelligence activities in the EU – why?

- What are skills needs and gaps by country/region, sector, occupation?

Pan-European skills forecasts carried out by CEDEFOP based on Eurostat LFS data (on EU Skills Panorama)

- What is the level of skills mismatches in the EU?
European Skills and Jobs Survey (CEDEFOP)

CEDEFOP SKILLS FORECAST 2018

Skills Adaptation/Anticipation and Labour Market Needs

#Stride4StrideBxl

Specific Sectors: Processes and Tools

“Bretagne Très Haut Débit”:

- A plan for deploying the optical fiber in Brittany (FTTH)
- All the local communities working together in the same issues :
 - economic development,
 - digital transition of traditional economy,
 - equal access to the publics services (health, care, learning...)
 - ...

Main Needs, Challenges and Concerns

Deploying FTTH need many manpower while :

- New jobs - Poorly known by the public
- Low anticipation of companies
- An insufficient regional vocational training offer
- Lack of cooperation between companies and public authorities

Regional council of Brittany competent in territorial and economic development and **vocational training** is the assembler of all energies.

Main Needs, Challenges and Concerns

➤ Think Global :

- Better knowledge of companies needs
- Financial agreement between parties
- Build a full training sector

➤ Act Local :

- Developing an **attractive and reactive training offer** for companies / for people (custom training)
- **Involve companies** (Before, during and after training) to attract people

Next Steps (FTTH)

- The needs of the companies will increase abruptly until 2022!
- Involve more and more companies
- Boost the VET in optical fiber and fasten it : the new VET Britain Program. Improve the attractiveness of Brittany for vocational training.
- Prepare people's skills for the next step : mobile telecommunication network, maintenance of networks...

Next Steps

Use the « optical fiber's method » with others economic sectors :

- **Digital economy** needs more and more high level skills : find the way to upgrade unemployed people. And also tourism, transport...

- **Digital transition** :
 - means many new jobs, still unknown : support innovation in vocational training
 - A good opportunity to integrate low skilled people ?
 - Support vocational training center in their own digital transition

- **For all these aims** :
 - Find better ways to work closer to companies
 - Design more reactive and flexible devices

Skills Adaptation/Anticipation and Labour Market Needs

#Stride4StrideBxl

Skills adaptation/anticipation in Tuscany Region

- Within the framework of Regional Law n. 32/2002, skills adaptation/anticipation is a high priority for Tuscany Region

Specific focus

Potential repercussions that technological innovations in the production process, commonly evoked with the term Industry 4.0, are producing and will produce in the future on the skills needed by the labour market

Skills adaptation/anticipation in Tuscany Region

- Analysis are developed mainly through IRPET, the Regional Institute for Economic Planning of Tuscany.
- On the basis of regional law, IRPET is responsible for:
 - a) Studying the region's socio-economic structure and its transformations, economic trends and relative analytical tools;
 - b) studying the regional territorial structure and its transformations and relative analytical tools;
 - c) studying methods for programming, assessing and checking policies.

Skills adaptation/anticipation in Tuscany Region

- In carrying out its activities, IRPET joins forces with Italian and foreign research centres, plays an active role in the network of regional research institutes and collaborates with:
 - Committee of the Regions, Universities, Enterprises,
 - UVAL DPS (Evaluation Unit of Public Investments, Department for Development Policies of the Ministry for Economic Development),
 - SVIMEZ (Association for industrial development in Southern Italy),
 - FORMEZ (Research and training centre for public administration), ISTAT (National Institute of Statistics),
 - Municipalities, Provinces, Ministries, Public Employment Services

Main Needs, Challenges and Concerns

INDUSTRY 4.0:

1. **Tuscan productive system is not yet considered by strong digitalization processes:** it does not know them, it is not able to bear the costs or it does not see the economic convenience. In fact, only a small proportion of companies express training needs consistent with the acquisition of digital skills
2. **The digital revolution certainly offers numerous opportunities, creating new jobs that did not exist before, but at the same time brings with it the destruction of a certain type and number of jobs that put at risk a non negligible slice of jobs.**

["The skills needs 4.0 of the Tuscan production system", IRPET Research]

- we are carrying out an **extensive research on Training 4.0** and on the potential repercussions that the technological innovations of the production process, Industry 4.0, are producing and will produce in the future on the skills and professionalism required by those who request work.
- The analysis also evaluates the **degree of exposure of human capital to the changes induced by the fourth industrial revolution and quantifies, as far as possible, the potential for replacing the occupied workforce.**

Two steps for Skills Anticipation

1. Identification of **strategic sectors** in the regional economy
2. Analysis of **strategic skills** needs

Identification of strategic sectors in the regional economy

Dimensions		Measurement
1. Job creation capacity		Difference between hirings and firings
2. Job quality	1b. Stability and work content	Share of open-ended contracts Share of days worked on potential days worked
	2b. Quality of human resources	Salary or average years of education
3. Competitiveness	1c. Share of dynamic firms	Firms with sales and employment growth higher than the regional average
	2c. Export capacity	Share of export on total sales

Identification of strategic sectors in the regional economy

Strategic sectors by share of workers in regional private economy

Analysis of strategic needs

	CURRENT NEEDS	EMERGING NEEDS

Skills Adaptation/Anticipation and Labour Market Needs

#Stride4StrideBxl

Region Västra Götaland

- 1.7 million inhabitants
- Export dependency
- Diversified businesses (industry, services, transports/trade)
- Excess demand for labour

Excess demand for labour – private sector (share of businesses that see labour shortage as an obstacle for growth, percentage)

Main Needs, Challenges and Concerns

- Increase the labour supply
- Balance between human capital invest. and labour demand
- Increase labour productivity
- Increase the labour market participation rates
 - Full employment among native born
 - Foreign born a resource
 - Human capital investments

Next Steps Forward

- Further analysis regarding labour supply/demand
- Support local actors;
 - Investments in innovations – increased labour productivity
 - Investments in human capital
 - Support of skill integration (Industry 4.0)

Skills Adaptation/Anticipation and Labour Market Needs

#Stride4StrideBxl

Main Needs, Challenges and Concerns

- More students in VET (50%)
- More women in VET (40%)
- More women in STEAM (10%)
- Better investment (4 % GDP)
- Improvement of the VET perception
- **Improvement the collaboration between VET and companies**

Specific Sectors: Processes and Tools

Sectors:

Production, mechatronics, maintenance industries, computing, electricity, building and civil works, chemistry, ...

The new scenarios in the new economy:

Data processing, programming, robotics, clean and sustainable energy, high digitalization, transport sharing, ...

The key, and soft, competencies:

Teamwork, empathy, resilience, leadership, decision making, self motivation, social commitment, responsibility, communication, flexibility, critical spirit, creativity, innovation, relationship, self management, proactivity, entrepreneurship, ...

Skills Adaptation/Anticipation and Labour Market Needs

Main actions:

- Profiles adapted to VET certificates and studies
- VET flexibilizing measures:
 - *constant adaptation to the needs of the qualification, contextualization of the training and the engagement of the all agents involved*
- Apprenticeship and training in companies to improve competencies and students' employability
- Improvement of the balance between the offer and the demand of professionals
- ...
